Comment

: Senai-Desaru Expressway (E22) have adopted the latest technique for its temporary pothole patching works. The temporary pothole patching using Xinlu Crack Sealant material makes pothole patching easier. The combination between Xinlu Crack Sealant and the coldmix material have made temporary pothole patching became more lasting especially during rainy seasons. Xinlu Crack Sealant provides a waterproof layer to prevent from surface runoff seepage. Therefore, it prolong the lifespan of the temporary pothole patching compare to the normal method. Furthermore, we could reduce the cost and increase our workability to ensure the safety of road users.

Once again thank you for your feedback and comments.

Your Sincerely

Mr Howie Gan Chee Hoe

Director
